The Anatomy of Mans body, as the parts thereof
are gouerned by the twelue Celestiall Signes.

♈ Aries head and face.

♉ Taurus necke
and throat.

♊ Cancer brest
and stomack

♋ Virgo belly
and bowels.

♌ Scorpio se-
crets a bladder

♍ Capricorne
knees.

♊ Gem. arms
e shoulders,

♌ Leo backe
and heart.

♎ Libra reins
and loynes.

♏ Sagitarius
Thighs.

♐ Aquarius
Legs.

♑ Pisces feet.

The fiery Ram he ruleth Head and Face,
In Necke and Throat the Bull doth challenge place.
The ayrie Twins they gouerne Armes and Hands.
The Brest and Stomacke Cancer she commands.
The lusty Lyon he hath Backe and Heart.
Bowels and Belly is the Virgins part.
In Loynes and Reynes is Libra's liberties.
And Scorpio rules the Stones and Priuities.
The Thighes and Haunch is Sagitarius song,
And both the Knees to Capricorne belong.
Aquarius makes the Legs much aches feeble,
And Pisces rules the Feet from toe to heele.

January hath xxxj dayes.

Warne meates and cloaths this Month are good,
Take heed of Bathes and letting blood.

1 Day, Sun riseth at 8. & 0. min. sets at 4. and 0.

15 Day, Sun riseth at 7. & 39. min sets at 4. & 21.

White. 1629.

A Prognostication for
this yeare of our Lord God,

1629.

Being the next after the *Bissextile*, or
Leape-yeare.

VVherein is conteyned the state
of the whole Yeare; the disposition of
each Quarter; and the Inclinati-
on of the Weather for euery Quar-
ter of the Moone through-
out the whole Yeare.

With the rising and setting of the Planets,
Husbandry Aduertisements, and other
*things fit to bee knowne, both plea-
sant and profitable.*

Also, at the end of the Booke, is the whole
Almanacke, contayned in one Lease, for this
Yeare 1629. which being cut out, is fit to be
placed into a Table-Booke, Booke
of Accompt, or other.

By Iohn White, Well-willer to the *Mathematicks*.

A briefe Declaration of the Disposition of the foure Quar- ters of this Yeare.

And first of Winter.

*The Winter Quarter best doth prophesie
To all Degrees, and Sexes, their estate.*

Sol in Capricorne, Aquarius, Pisces.

The Winter (and first Astronomicall Quarter) taketh beginning, when the Sunne entereth into the first degree of the Himall or earthly Signe Capricorne, which was the last Yeare 1628. vpon Friday the xii. day of December, and doth continue till Twelue day, being the tenth day of March this yeare 1629. In which space of time, the Sunne maketh his progression through these three Winterly Signes, Capricorne, Aquarius, and Pisces.

By nature this Quarter is of a colde and moyst qualitie, (contrary to the Summer) participating of the Phlegmaticke Complexion, which Element hath chiefe predominacion (in the Body of Man) from thre of the clock in the afternoon, till rise of the clock at night. Now both the Sea-coast Mariner endure many a storme on the raging Ocean, the Windes roaring, making the billowes of the Seas to swell with rage: Floods doe abound, the Ayre is very colde and piercing, daies doe shorten, nightes doe lengthen, and the strength of every Creature decayeth: Now are the pores of the Earth enclosed and shut vp, by the extreme coldesse of the Ayre: Fowles couer the warmest Regions, Beastes seekethem a shelter, Serpents betake them to their houses, and the Fishes get into the deepest of the Waters, for their most comfort and warmth; And whatsoever the cheerefull Spring and comfortable Sommer doth produce and nourish, this Quarter doth destroy and vanishe. The most colde and dry the Winter is,

A Prognostication.

the more wholesome for Man and Beast, but too much colde killeth Trees and Plants in a warme Climate. A moist and warme Winter, is an enemy to nature, yet a friend to Husbandry, and indifferent store of Snow both ranken the earth, and preserve the Cowne. It is expedient for our healthes, that we note such Weates whose operation are of a hot and dry quality; and to expell the colde of the unwholesome Ayre, by good Fires, warme Broathes, comfortable Drinckes, and strong Wines; being careful to keepe the Head and Feet from cold and wet: Yet can the Body not digest more grosse and strong Weates then in Summer, by reason that naturall heate is driven (by the colde of the Ayre) into the inward parts of the Body, to comfort the vitall Spirits, and helpeth digestion.

The Diseases commonly attending this Quarter, are these (or the like) as Passies, Coughes, Poles, Goutes, sore Eyes, Rheumes, Cramps, Toothach, Catarrhs, Scatarrhes, Fluxes, &c.

The Second part of the Yeare called the Spring.

*The Spring compared is to Infancy,
To spring and grow in Vertue till we dye.*

Sol in Aries, Taurus, Gemini.

The cheerefull and comfortable Spring, taketh beginning when the bright Eye of Heaven entereth into the first degree of the Vernal Equinoctiall Signe Aries, (which is on twelveday, the tenth day of March,) and doth continue till Friday, the xij. day of June, in which time the Sunne passeth through these three Signes, Aries, Taurus, and Gemini.

The vitall and naturall quality of this Quarter, is to be hott and moist, taking part of the Sanguine Complexion, which Element hath most predominacion from nine of the clock at night, till three of the clock in the morning. The Dayes and Nights are now of an equall length, and the radiant beames of Sol shined cheerefully upon the face of the Earth, causing it to produce all kinde of varieties to our sense and view. Of all the Quarters

In the yeare, this is the most wholesome and pleasant, being the most fittest time to remooue Diseases of a long continuance, and to remooue those which are likely to ensue. Now doe the Birdes of the Ayre comple and breed, Beasts of the Earth increase, Fishes of the Waters doe multiply in aboundance, leauing the deepe to be in more shallow places: The fructifull Earth doth produce all sort of Flowers, Herbes, Fruits, and Plants, for the needfull vse of Man and Beast. The Spring ouer-wett increaseth Weedes, causing Fruits to be scarce and rotten. It is convenient for our healthes, that we now take such Meates as are of cold and drye quality, and let your Drinckes be more coole and small then in Winter; And it is a convenient time to Purge, Urine, Blood, and Sweate, if need require.

The usuall Sickneses of this Quarter, are Measells, Small-poxes, Scabbes, Puskes in the Face, Agues, Phrensies, Kinges-euill, &c.

Of the third part of the Yeare, called Summer.

*Like Man in his chiefe state and lusty yeares,
The ripening Summer Quarter best appears.*

Sol in Cancer, Leo, Virgo.

The Summer Quarter doth take beginning, when the Sun is mounted to the highest Grade of the northerne Tropique Cancer, which is upon Friday the twelfth day of June, and doth continue till Sunday the thirteenth day of September, in which time he passeth through these three Sollicitall Signes, Cancer, Leo, and Virgo.

The usuall and naturall quality of this Quarter, is to be hot and dry, representing the Cholerick Complexion, which Element hath most gouernment from three of the clocke in the morning till nine before noone. The glorious Sunne is now at the highest, making the Dayes longest and the Nightes shortest: Heate is at the highest, floods at the lowest, Seas quietest, and the Windes calmest; And now is the fructifull Earth cloathed in

A Prognostication.

her richest embroidery, who imparteth of her bounty to all living Creatures for their use and comfort: Flowers are in their beauty, and Fruits in their prime, and the laborious Bees gather Honey for their future sustenance: Naturall heate is now dispersed abroad to the outward parts of the Body, and Man is now not so hotte within as in Winter, nor can he Digest such grosse and Strong Meates as then, yet the most small and coole Drinks are most convenient for our healthes, and little hope of Meates both best suffice nature, and that which is boyled is most whole. Come, and take such things as are of a colde and moyst quality: Summer overtwet puttifieth Fruite, and destroyeth Corne.

The vsuall infirmities of this Quarter, are Pestilence, Feuers of diuers kindes, Jaundies, Agues, paine of the Head and Belly, &c.

Of the fourth part of the Yeere, called Autumne or Haruest.

*As Autumne steales the sappe from Tree and Flower,
So Death comes creeping neerer euery houre.*

Sol in Libra, Scorpio, Sagitari.

Autumne (vsually called the Fall of the Lease) doth begin on Sunday the xiii. of September, when the Sunne doth enter into the first Degree of the second Equinoctiall Signe Libra, and doth continue till Saturday the xii. of December: in which time the Sunne passeth through these Autumnnall Signes, Libra, Scorpio, Sagitari.

Naturallly this Quarter is of quality colde and dry. participating of the Melancholy Complexion, which Element hath chief predomination from nine of the clocke in the morning till three in the afternoone. Now are the Daies againe equally ballanced with the Nightes: Grass is mowed, Corne reaped, Fruits are gathered, and the painefull Husbandman reapeth the profit of his future Labours: The face of the Earth now loseth her former beauty, Flowers fade, Leaues doe fall, Floods melteth, and all Creatures loseth their former strength and vigour, and

White. 1629.

The most part of sensible Creatures seeke for Shelter against the
harmes ensuing Winter: This of all the other Quarters of the
yeare is the most unwholsome, breeding diseases of diuers kindes
in our Bodies: therefore beware of the euening and morning
cold, and take such things whose operation is to heate and moy-
sten: yet it is a fitt time to Purge, Bathe, and Bleede. Too
much wette purrifieth Sinapes, making bad Wines, and scarcity
of Fruits the ensuing Yeare.

The Diseases of this Quarter are many, as these or the like,
the Stone, paine in the Backe and Kidnies, sore Eyes, Melan-
choly, Falling sicknesse, Agues, Fluxes of Blood, Fistulors,
Spleene, Emoids, &c.

The Rising and Setting of the Pla-
ners, with the disposition of the Weather,
for euery Quarter of the Moone for
this Yeare, 1629.

January.

♄ Saturne is nere the South at Sunne setting.

♃ Iupiter. ♂ Mars. and ♀ Mercuri are in the west at Sunset.

♀ Venus sheweth bright in the west after Sunne setting.

Last Quarter on Tuesday the vi. day, 26 minutes after vi.
of the clocke in the morning, frost.

New Moone on Wednesday the xliii. day, 26 min. after ix. of
the clocke in the morning, snow or sleet.

First Quarter on Thursday the xli. day, 43 min. after vi. of
the clocke in the morning, wind.

Full Moone on Wednesday the xlviii. day, 47 min. after ix. at
the clocke at night, frost.

A Prognostication.

February.

♄ Saturne is creeping toward the South at Sunne setting.

♃ Jupiter, ♂ Mars, and ♀ Venus lodge together in the West at Sunne setting.

☿ Mercuri is under the beames of Sol.

Last Quarter on Wednesday the xiii. day, 19 min. after xi. of the clocke at night, troublefome weather.

New Moone on Friday the xiii. day, 48 min. after iii. of the clocke in the morning, wette.

First Quarter on Friday the xx. day, 7 min. past v. of the clocke at night, windy and wette.

Full Moone on Friday the xxvii. day, 17. min. after viii. of the clocke in the morning, windy.

March.

♄ Saturne is in the East at Sunne setting.

♃ Jupiter shyneth very bright South west at Sunne setting.

♂ Mars and ♀ Venus shyneth in the west after the Sunne sette.

☿ Mercuri is in the East before the Sunne.

Last Quarter on Friday the vi. day, 57 min. past v. of the clock in the evening, indifferent.

New Moone on Saturday the xiii. day 44 min. past vii. of the clocke at night, tempestuous.

First Quarter on Saturday the xxi. day, 22 min. after xii. of the clocke at midnight, greates windes.

Full Moone on Saturday the xxviii. day, halfe an hower after vii. of the clocke at night, witte.

Aprill.

♄ Saturne riseth presently after the Sunne setting.

♃ Jupiter is full South at Sunne setting.

♂ Mars is South east at Sunne setting.

♀ Venus and ☿ Mercuri are in the West at Sunne setting.

Last Quarter on Sunday the v. day, 46 min. after xii. of the clocke at noone, sweet shewers.

New Moone on Monday the xiii. day, 47 min. after viii. of the clocke in the morning, fayre.

First

White. 1629.

First Quarter on Monday the xx. day, 51 min. after v. of the clocke in the morning, cloudy.

Full Moone on Monday the xxvii. day, halfe an hower after vii. of the clocke in the morning, faire.

May.

♄ Saturne is creeping toward the west at Sunne rising.

♃ Jupiter sheweth very bright toward the South at Sunset.

♂ Mars is South west at Sunne setting.

♀ Venus and ☿ Mercuri sets presently after the Sunne.

Last Quarter on Tuesday the v. day at vii. of the clocke in the morning, faire.

New Moone on Tuesday the xii. day, 6 min. after vii. of the clocke in the evening, faire.

First Quarter on Tuesday the xix. day, at xi. of the clocke at noone, tempestions.

Full Moone on Monday the xxvi. day, 40 min. after viii. of the clocke at night, coole blasts.

June.

♄ Saturne is past the South at Sunne rising

♃ Jupiter shineth gloziouly toward the East at Sunne sette.

♂ Mars is South west at Sunne setting.

♀ Venus and ☿ Mercuri are neere the Sunne.

Last Quarter on Tuesday the iii. day, halfe an hower after xi. of the clocke before noone, faire.

New Moone on Wednesday the xi. day 28 min. after iii. of the clocke in the morning, cloudy.

First Quarter on Tuesday the xvii. day, 35 min. after v. of the clocke in the afternoone, very hotte.

Full Moone on Thursday the xxv. day, at xi. of the clocke at noone, coole blasts.

Iulie.

♄ Saturne is creeping toward the South at Sunne rising.

♃ Jupiter riseth at Sunne setting.

♂ Mars is past the South at Sunne setting.

♀ Venus is under the beames of Sol.

☿ Mercuri riseth a little before his Master.

A Prognostication.

Last Quarter on Friday the iii. day, 3 min. after two of the clocke in the afternoone, raine.

New Moone on Friday the x. day, 53 min. after x. of the clocke in the morning, fayre.

First Quarter on Friday the xvii. day, 44 min. after two of the clocke in the morning, faire.

Full Moone on Saturday the xxv. day at 16 min. past two of the clocke in the morning, cloudy.

August.

♄ Saturne is South-east at Sunne rising.

♃ Jupiter riseth at the Sunne setting.

♂ Mars is past the South at Sunne setting.

♀ Venus riseth a little before the Sunne,

☿ Mercuri setteth a little after the Sunne.

Last Quarter on Sunday the second day, 3 min. after two of the clocke in the morning, wet.

New Moone on Saturday the viii. day, 11 min. after vi. of the clocke in the Evening, Raine.

First Quarter on Saturday the xv. day, at iii. of the clocke in the afternoone, faire.

Full Moone on Sunday the xxiii. day, at vi. of the clocke in the evening, Thunder and Lightning.

Last Quarter on Monday the xxxi. day, 48. min. after xi. of the clocke at noone, cloudy.

September.

♄ Saturne and faire ♀ Venus rise together before the Sun,

♃ Jupiter is past the South at Sunne rising.

♂ Mars is fiery red in the South at Sunne setting.

☿ Mercuri followeth the Sunne at the heeles.

New Moone on Monday the vii. day, 16 min. after two of the clocke in the morning, faire.

First Quarter on Monday the xiiii. day, 37 min. after vi. of the clocke in the morning, colde.

Full Moone on Tuesday the xxi. day, 43. min. after x. of the clocke in the forenoone, windy and wet.

Last Quarter on Friday the xxviii. day, 33 min. after viii. of the clocke at night, raine,

October.

White. 1629.

October.

♄ Saturne and ♀ Venus settes with the Sunne.

♃ Jupiter is South at Sunne rising.

♂ Mars (looketh angry at Saturne & Venus) in the South at Sunne.

☿ Mercury vñers the Sunne in the morning.

New Moone on Tuesday the vi. day, 3. min. after xii. of the clocke at noone, wette.

First Quarter on Wednesday the xiii. day, at one of the clocke in the morning, wette.

Full Moone on Wednesday the xxi. day, 45. min. after midnight, wette.

Last Quarter on Thursday the xxix. day, 24 min. after two of the clocke in the morning, cloudy.

November.

♄ Saturne is in the west at Sunne setting.

♃ Jupiter and ☿ Mercury rise before the Sunne.

♂ Mars is South-east at Sunne setting.

♀ Venus settes with the Sunne.

New Moone on Wednesday the iiii. day, 23 min. after midnight, wette.

First Quarter on Wednesday the xi. day, 34. min. after ix. of the clocke at night, windy.

Full Moone on Friday the xix. day, 38 min. past two of the clocke in the afternoone, cloudy.

Last Quarter on Friday the xxvii. day, 41 min. after v. of the clocke in the morning, tempestuous.

December.

♄ Saturne is past the South at Sunne setting.

♃ Jupiter and ♀ Venus are forning lippes together in the East before the Sunne.

♂ Mars is in the East at Sunne setting.

☿ Mercury is in the West at Sunne setting.

New Moone on Friday the iiii. day, 25 min. after iiii. of the clocke in the afternoone, frost.

First Quarter on Saturday the xii. day, 4 min. after vi. of the clocke at night, wette.

Full

A Prognostication.

Full Moone on Sunday the xx. day, 56. min. after iii. of the clocke in the morning, raine.

Last Quarter on Saturday the xxvi. day, 17 min. past v. of the clocke in the evening, frost.

K. Charles. 1625 March 27 after which, waiting 5 yeares, without
God graunt a long, prosperous and peaceable raigne.

A Prognostication.

The explanation of the former Table.

NOte that every King began his raigne, the same time that the next precedent King ended his.

If you desire to know how long it is since the beginning of the raigne of any King, looke how long it is since the ending of the precedent King, and there you shall finde your request.

As for example: If you would know when King Henry the 8 began his raigne, how long he raigned, and also how long it is since his raigne: find out first his name amongst the names of the Kings, and searching the rowe towards the right hand, you shall finde he began his raigne in the yeare 1509 the 22 of Aprill, and under the title of the time that he raigned, is 37 yeares, 10 months, and 1 day: And looking forward in the same rowe, where is 120 yeares, Aprill 22 under the title of since their raigne, and so long it is since he dyed.

How to iudge what Weather will follow, by the rising and setting of the Sunne.

The Sunne rising bright and cleare, signifieth a pleasant day: If he rise fiery red, it promisseth raine: If in his rising he be thinly overcast with a cloud, it betokeneth foule weather: If the Sunne put the clouds before him into the West, it signifieth faire weather: If at his rising there appeare a circle about him, & be indifferently away equally, it betokeneth faire weather. Also, if he setteth red, it signifieth faire weather: If at his setting he be of divers colours, & clouds like water, it threatneth raine. If at the rising of the Sun, his beames seeme red, & long, & encompassed with red clouds, it signifieth great windes: If at his setting there appeare a thicke mist, & if it raineth in the evening, it threatneth very foule weather to follow. Also, if the Sunne beames be spotted either greene, pale, & blacke, gathered to a cloud, it signifieth raine. The Sun setting cleare without any cloud, signifieth a faire night to ensue. If the circle, & circles about the Sun be cleare, & of no continuance, looke for faire weather: If there be many circles, it signifieth windes: the redder they are, the more vehement windes. If the circles are here and there broken, and are thicke and blacke, looke for cold wind & snow: Or, if he settle behinde a great black cloud, raine followeth.

How

How weather is foreknowne by the Moone.

If the Moone in the third day of her change, or three daies before her full, or in the midst of the quarter, be found of pure light, nothing encompassing her, the ends direct vp, shee promisseth sayre weather: but bent to red color, prouoketh winds. The Moone pale, or somewhat blacke or thicke, threatneth raine. When the Moone is five dayes olde, marke the tips of her hornes, if they be blunt, it signifieth raine: if sharpe poynted and pꝛicking vponwards, great winds. If in the fourth day after her change, she haue a red circle about her, it signifieth winds and raine.

Of the iudgement of the weather by the Stars.

If the Starres appeare of much light, and seeme to be of more brightnesse & blazing then ordinary, it betokeneth great winds & moisture in that part where they seeme so: and in Winter, great frosts. When diuine Starres appeare with long fiery tayles, it threatneth winds, and great drought: the more in number, the greater will be the effect. Also, when Starres seeme to shoot or fall, it signifieth great winds in that place: If they seeme to shoot in diuers places, it signifieth diuers winds: If in all places, winds, thunder, lightning, and most tempestuous weather.

A short Instruction, and very necessarie to know
the times and seasons when to Sow, and replant
all maner of Seedes for the Garden.

Sow Cabbages in Februarie, March, or April, in the Wane of the Moone: and replant them in the Decrease.

Sow Cabbage-Lettuce in Februarie, March, or Iulie, in the wane of the Moone.

Sow Onions and Leekes, in Februarie or March, at the Wane of the Moone.

Sow Berres in Februarie or March, at a full Moone.

Sota

A Prognostication.

- Sow Coleworts** white & greene, in the middle of August or September: Plant the young ones in October, and lett them againe in November.
- Sow Parsneps** in February, Aprill, or June, in a fayre day.
- Sow Radish** in February, Aprill, or June, in the increase of the Moone.
- Sow Pumpions, Colwumbers, Mollons, and Courdes**, in February, March, or June, in a hott and fayre day.
- Sow Spinage** in February or March, in the old of the Moone.
- Sow Parsely, Fennell, and Anis-seede**, in February or March at the full of the Moone.
- Sow white Cicory** in February, March, July, or August, in a full Moone.
- Sow Cardus-benedictus** in February, March, or May, when the Moone is old.
- Sow Bassil** in March, in an old Moone.
- Sow Purcelaine** in February, or March, in the increase of the moone.
- Sow Dargeman, Clolets, Tyme, Flower-gentle, Rosamary, & Lavender**, in february, March, or Aprill, at the increase of the Moone.
- Sow Garden cresses, and Rocket**, in February, at the increase.
- Sow Sausill** in February or March, at a new Moone.
- Sow Coxander, and Bojage**, in February or March, at the Moones increase.
- Sow Harts-horne, and Samphire**, in February, March, or Aprill, at an old Moone.
- Sow Gillsflowers, Hearts-ease, and Wall-flowers**, in March or Aprill, in an old Moone.
- Sow Cardus, and Artichokes**, in March or Aprill, when the Moone is old.
- Sow Chick ween**, in February or March, at the full of the Moone.
- Sow Burnet** in February or March, at an old Moone.
- Sow Hysop and Sanery** in March, when the Moone is old.
- Sow double Marigolds** in February or March, at the increase of the Moone.
- Sow Larkes-foot, Sparges, and Sperage**, in February, in an old Moone.

A Prognostication.

Sow white Poppy, and Palma-Christi in February or March, at the increase of the Moone.

Sow all manner of Tyme the Moone increasing, she being in Cancer, Libra, or Aquarius.

Sow all kind of Seeds the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorne, Aquarius, or Pisces: but those Seedes whose Rootes are round, should be sowne thre or fower dayes before, or after the full Moone.

Certaine and short Rules, for the comforting of the chiefe officall Members of the Body of Man.

Things which are good to comfort the Head.

Lignum-Aloes Mariorum, Galingale, Muske, Rosemary, Roses, Cammomell, Rue, Frankinsence, Anniseeds, Hyssop, Balme, Mints, Spike, and Gladen.

Things good for the Eyes.

Fennell, Aternex, Cloves, Cold water, Celadine, Cybright, Roses, and Agrimony.

Things good for the Stomacke.

Putnegg, Cloves, Digantum, Corall, Saffron, Quinces, Wormewood, Dillanum, Agrimony, Funetory, Marshmalls, Lignum-Aloes, Spodium, and Coriander prepared.

Things good for the Heart.

Saffron, Cloves, Sinnamon, Mace, Putnegg, Mariorum, Burage, Buglosse, Rosemary, Mirabolanes, Pearles, Lignum-Aloes, Corall, Muske, and Sertwell.

Things good for the Liuer.

Liverwort, great Raysons, Wormewood, Agrimony, Saffron, Cloves, Endive, Violets, Fennell, Plantaine, Dragons, Rose-water, Lettuce, Violets, Sanders.

Things good for the Lungs.

Licoris, Raisons, Almonds, Dates, Lungwort, Maydenhaire, Lungwort, Cheompane, Pistaces, and Remedies.

C

Things

White 1629.

Things hurtfull for the Body.

Meates hurtfull to the Teeth.

Nettes, Meates very hot, warme drinke, Sweete meates and drinckes, Radish rootes, hard meates, Bitter meates, Mlike, much Clomiting, Letkes, Fatte of Fish, Colbroots, & Lemmons.

Things hurtfull to the Eyes.

Garlicke, Datons, Radish, Drunkenesse, Letherie, Sweete and thicke Wines, Salt meates, Colebroots, all Drinke, Must, Wine, Dust, Smoake, Fire, and reading presently after supper.

Rules of Mensuration.

A Fingers bredth is foure Barly comes in thicknes; and an Inch three Barly comes in length: A hands bredth foure fingers: A span is three hands bredth: A foot is foure hands bredth: A Geometrical Palse is five foot: an English Pearch is xvi. foot $\frac{1}{2}$. A Furlong is a hundred, & twenty five pases, or six hundred, twenty and five foot: An English Furlong is six hundred and threescore foot, or a hundred thirtie two pases: A League is a thousand and five hundred pases: An Italian Mile is a thousand pases, or eight Furlongs: A common German Mile is thirty two Furlongs. An English Mile is eight Furlongs: An Acre is foxtie Pearches in length, and foure in bredth.

A short Instruction for the Table following.

Note that the first Columne of Row, containeth the Names number of Shires, the second of Cities, the third of Bishopricks, the fourth of Castles, &c. Now goe straight in a line, and you shall easily finde the number Alphabetically, aswell by the English as for the Welch shires: As for example, Buckinghamshire hath no Cite, no Bishopricke, 11. Market Townes, no Castles, 185. Parishes, &c.

A Catalogue of all the Shires, Cities, Bishop-
rickes, Market-Townes, Castles, Parishes,
Riuers, Bridges, Chases, Forrests, and Parkes,
conteyned in euery particuler Shire
in the Kingdome of England.

**A Table to know how many Howers and
Minutes the Moone shineth euery Night
in the Yeare.**

The age of the Moone encreasing.	The Houres and Mi- nutes that she shineth.		The age of the Moone decreasing.
☾	Houres.	Minutes.	☾
1	0	48	29
2	1	36	28
3	2	24	27
4	3	12	26
5	4	0	25
6	4	48	24
7	5	36	23
8	6	24	22
9	7	12	21
10	8	0	20
11	8	48	19
12	9	36	18
13	10	24	17
14	11	12	16
15	12	0	15

The vse of this Table.

Seeke the age of the Moone in the Almanack, then looke the
same in this Table, which you shall find either in the encrea-
sing or decreasing, and then in the middle Colunne you shall
without further labour find the time of her shining.

As for Example: Upon the 18 day of January, I would
know how many Howers and Minutes the Moone shineth: I
find in the Kalender it is New Moone the 14 day, then reckoning
from thence to the 18 day, I find she is 5 daies old: Then entering
this Table, it sheweth, she shineth 4 howers and 0 minutes: So
let it be knowne when she is 25 daies old, &c.

White. 1629.

The explanation of a new and easie Kalender here following, for this present Yeare, 1629.

NOte that every Moneth conteyneth three rowes of Col-
lumnnes, (the Figurers for the number of Dayes excepted) the
first Colunne toward the left hand conteineth the Weeke Days
and Sunday Letter. The second, the Signe wherein the Moone
is every day. And the third, the Changes and Quarters of the
Moone. Note that the being thus  figured doth signifie the
new Moone: and placed thus  way is the first Quarter: This
 the Full Moone; And againe this  the last Quarter. Note
also, that the Figures over the head of the Moones, doe signifie
the houre of her Changes; and the Letters underneath, the time
after noone, or after midnight, N. standing for after noone till
Midnight, and M. for after Midnight till Noone.

As for example, Against the 6 day of January, being Tewe-
day, I doe finde the Moone in  Libra, and is this way  characterized, which is the Last Quarter, at 6 of the clocke in the
Mornning.

Againe, on the 13 day of February, being Friday, I doe
find the Moone in  Pisces, and is thus  figured, which is
the New Moone, at 4 of the clocke in the Mornning. &c.

Note also, that at the head of every Moneth is placed the Rising
and Setting of the Sunne for the middle of every Moneth: As
for example, for the midst of January the  Sun riseth at 7 of
the clocke, and 40 minutes; and setteth at 4 of the clocke and
20 minutes.

It also conteyneth (on the back side of the leafe) for every Mo-
neth, the Holy-dayes, and Feasts, both Moueable and Im-
mouable; with the beginning and ending of every Terme:
As Easter-day is on the 5 day of Aprill, Whit Sunday on the 24
day of May: Terme begins on the 23. of January, and ends
on the 12 of February, &c.

A lase

A briefe and easie Kalender for this Yeere
 1629. which being cut out, is fit to be placed
 into any Booke of Accompt, Table-book, or
 other, conteyning the whole Almanacke, in
 a short method; By Iohn Whire.
